

3 ways

Sophos protects you against Cyber Attacks and helps with GDPR readiness

The situation

Local Government bodies hold a vast amount of personally identifiable citizen data and are typically challenged with decreasing budgets, legacy and/or multi-vendor technology, whilst constantly under threat of cyber attack.

We know that. And so do the hackers.

GDPR

What is it?

The EU General Data Protection Regulation (GDPR) strengthens data protection for EU citizens' personal data

The deadline

The fines

Up to €20m or 4% worldwide turnover for breaches of personal data

Data breaches

57% are due to hackers or malware
23% are due to unintended disclosure

The reality

Only 41% local government employees believe that their current IT security practices would offer suitable protection against cyber crime*

The solution

Organisations must **encrypt data** to protect their users and themselves

It's time to STOP!

The top causes of data loss

Malware & hackers
Loss or theft of a device

Sophos Central,
Intercept X, Sophos Mobile

Threats at the door

Block data-stealing attacks before they hit your network

XG Firewall,
Secure mail

User mistakes and misuse

Keep your data safe even when it leaves your network/devices

SafeGuard Encryption

How Sophos helps you meet the data security challenge

Real-time threat protection

Secure collaboration across all devices and platforms

Full disk encryption for compliance

Deep clean your system, removing all lingering traces of malware

Proactively protect data against theft with always-on encryption

Understand attacks with easy-to-use, visual Root-Cause Analysis (RCA)

Secure your data a couple of clicks

As a Sophos Platinum partner, Trustmarque helps organisations adopt unrivalled data protection solutions that keep data and devices secure from today's complex, sophisticated attacks, become more compliant with the GDPR and ultimately reduces the risk of a fine.

SOPHOS
Platinum Partner

Stay safe. Be compliant. Get secure. Get Sophos.
