

Unlock AI and digital transformation with our AI Centre of Excellence

Why Trustmarque for AI?

- Strategic partnerships with leading vendors like Microsoft and IBM to offer enterprise-grade AI solutions.
- Proven expertise in integrating AI technologies into existing business processes to maximise ROI.
- Comprehensive support through Trustmarque's AI CoE, delivering workshops, governance frameworks, and transformation roadmaps.

AI with intention

We help identify your goals and objectives, offer advice and formalise an initial objective to deliver a specific function or use case. Before recommending technology, we ensure you have:

- AI ethics and governance charter
- AI transformation roadmap
- AI business value assessment

AI Centre of Excellence

- Tailored workshops to align AI adoption with your business goals.
- Governance frameworks ensuring ethical and compliant AI practices.
- Customised AI transformation roadmaps to accelerate adoption.

Acutest AI Governance

Governance evaluation: Ensures regulatory compliance, builds trust and adoption of AI.

Governance maturity: Delivering good practice suggestions and an implementation approach.

Risk reduction: Identify inefficiencies and issues, mitigate risks associated with AI deployment.

Data, Apps, Automation

Data: refine, clean, organise, and centralise your business data for leveraging with AI.

Apps: build apps with integrated AI capabilities for your business use cases.

Automation: leverage automation with AI classification, recognition or risk analysis.

End-to-end AI excellence

Imagine a workplace where repetitive tasks are automated, decision-making is guided by real-time insights, and processes are continuously optimised. Trustmarque makes this vision a reality.

Seamless AI integration

Our solutions leverage Microsoft Azure AI and IBM watsonx to create advanced capabilities for you with natural language processing, predictive analytics, and computer vision.

Responsible innovation

AI adoption should never be at the expense of ethics or compliance. Our AI governance framework and tools ensure your AI systems are safe, transparent, and aligned with regulatory standards.

Custom solution for you

Whether you need automation, advanced analytics, or customer experience enhancements, our tailored AI applications and workshops unlock the potential of your data and processes.

AI Governance

A strong governance approach across your organisation is key, as part of a wider governance strategy. Let's work together to deliver:

- ✓ Envisioning workshops
- ✓ A bespoke Proof of Value
- ✓ Use case discovery and design
- ✓ Adoption services
- ✓ A strong governance strategy
- ✓ Short and long-term roadmap

Get started today

Are you ready to harness the power of AI for your business? Let us help you take the first step with a tailored workshop or proof-of-value engagement.

Contact your account manager today to explore how we can build something together.
